Search on the Store

Search for the ACCUNIQ Connect app on the App Store or Play Store and download it.

QR code recognition

Read the QR code through the Scan app to download the app.

Cautions

- ※ Body composition measurement items stored in ACCUNIQ Connect cannot be used for medication or treatment by the user's arbitrary interpretation.
- ※ For detailed analysis of body composition measurement results, be sure to consult with a specialist.
- ※ The body composition result items provided on the app may differ depending on the type of equipment being measured.
- ※ The function may not be supported depending on the smartphone type. (Android 10, iOS 14 Version)

Easily save body composition data to your smartphone

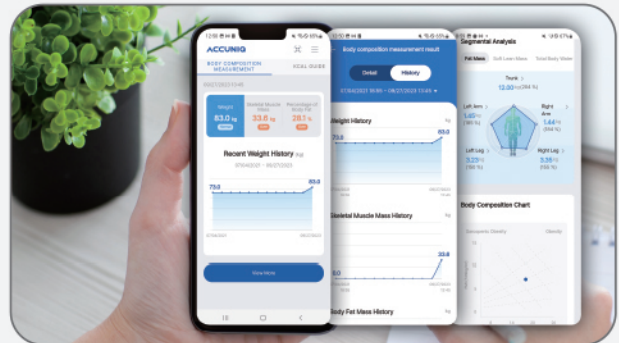

You can save the test results in the app by scanning the QR code provided on the ACCUNIQ body composition analyzer result screen or printed result sheet without having to keep the result sheet.

Check body composition result data on your smartphone

Check detailed body composition measurement data such as skeletal muscle and fat analysis, obesity analysis, comprehensive evaluation, etc. on the smartphone.

※Detailed body composition information is provided differently depending on the ACCUNIQ body composition test equipment.

Body composition management customized to the user's body Provide a goal and calorie guide

Provide a questionnaire for preparing physical activities to create management goals based on health status responded by the user, and measurement result data. It provides recommended daily intake and recommended calorie consumption for health management based on the saved activity level, target diet period, and control target.

Provide body composition measurement results measured periodically in a graph

As it provides a graph of changes in weight, muscle mass, and body fat percentage measured multiple times, you can compare how body composition has changed according to health management results.
